

I listen to K-LOVE 94.7 FM daily. It is an important part of my religious life. If a LPFM broadcastor is allowed to displace K-LOVE, the only radio that will be available in my area is music that promotes violence, disrepect toward authourity and self indulgence. The right to worship, of which christian music is an essential element, is a fundamental right that should not be infringed upon, by the federal government. In a time when the government recognizes the importance of faith-based initatives, K-LOVE plays an important part in providing a positive and uplifting message.
